

Indoor/Blinds/Venetians

Venetian Blinds

The ultimate in light control and practicality.

Weathermaster®

Timber Venetian Blinds

Timber Venetian Blinds

Natural wooden slats crafted into premium window shades - Timber Venetian Blinds are sourced from Plantation grown resource so no native forestry is impacted. Whether your architecture is contemporary or traditional, Timber Venetians give your home a relaxed ambience that never goes out of fashion.

Premium timber

Timber is selected from premium mills, then crafted and stained or painted. Only plantation grown timber is used for Weathermaster® Timber Venetians.

Long-term view

You can be confident that you're taking the long-term view for your home and the planet with Weathermaster® Timber Venetian Blinds. The lacquered timber finishes are UV resistant, demonstrating little change in colour after five years in the New Zealand sun. Timbers used are all from renewable resource managed forests.

Special shapes

Timber Venetian Blinds can be made to fit windows and doors that are unusually shaped, i.e. sloping top (Max slope 45° - limited lift) or sloping bottom (Tilt only).

Easy care

Simply dust your timber venetians weekly with a feather duster or use the vacuum cleaner brush attachment. Professional cleaning is recommended annually.

Highly durable

Manually operated and motorised products have been cycle tested to ensure longevity over many years of operation.

Operating systems

The right operating system makes life a little easier

Somfy® Automation

Hard-wired automation using a 240V motor integrated in the headrail. Controlled by a Wall Switch or Remote Control.

Cord control option

Featuring lift and tilt functionality to precisely position the slats to any desired angle for optimal light control. Colour co-ordinated control cords are constructed

from durable materials to ensure many years of smooth operation - complete with colour co-ordinated wooden tassels.

Slat sizes

Enhanced light control and view through

50mm slats

For a traditional look and optimal light control and privacy, 50mm slats are available in a range of colours.

60mm slats

Achieving an improved view through and 'shutter look', the 60mm slat is perfect for larger windows. Available in contemporary paint and stain finishes.

Masterwoods® Venetians

Masterwoods® Venetian Blinds

Weathermaster® Masterwoods® Blinds provide the look of real wood with the quality and durability of advanced technology that is resistant to discolouration and warping.

Innovative blinds

The look and feel of timber from a durable 100% Polyresin product that's UV treated and resistant to heat and humidity. These innovative blinds will resist warping, chipping and cracking and are available in an attractive wood grain effect or a palette of whites and neutrals.

Perfect for high humidity areas

Impervious to moisture, Masterwoods® Venetian Blinds are perfect for high humidity areas like bathrooms and kitchens due to the Polyresin material, which resists the effects of moisture. Polyresin is also lighter than timber, making the blinds easier to raise and lower while still offering slats that are rigid and durable.

Cost Effective

High quality Masterwoods® Venetian Blinds cost about 10% less than organic wood Venetians, so your home improvement budget will go a good deal further.

Low maintenance

Simply dust Masterwoods® Venetian Blinds with the vacuum cleaner brush attachment or wipe with a damp cloth. The outside surface material goes all the way through, so it won't wear away, meaning your blinds will look new for years to come.

Size options

There are two slat sizes to choose from (50mm and 63mm), with the 50mm and 63mm are available in wood grain effect or a palette of whites and neutrals.

Uniform appearance

Masterwoods® Blinds have been developed to capture the real look of wood and to eliminate any inconsistencies with colour, grain and pattern that you might traditionally find with real timber. This consistent wood look gives the blinds a more uniform appearance.

Operating systems

The right operating system makes life a little easier

Somfy® Automation

Hard-wired automation using a 240V motor integrated in the headrail. Controlled by a Wall Switch or Remote Control.

Cord control option

Featuring lift and tilt functionality to precisely position the slats to any desired angle for optimal light control. Colour co-ordinated control cords are constructed

from durable materials to ensure many years of smooth operation - complete with colour co-ordinated wooden tassels.

Slat sizes

Achieve different looks from traditional to contemporary

50mm slats

Masterwoods® with 50mm slats are available in wood grain effect or a palette of whites and neutrals. Maximum blind size: 3.0m².

63mm slats

The larger 63mm slat achieves an improved view through with increased slat spacing. Maximum blind size: 3.0m².

Aluminium Venetians

Aluminium Venetian Blinds

Providing a timeless design to suit most interior styles - Weathermaster® Aluminium Venetian Blinds are simple and stylish. Manufactured from up to 97% recycled material these are an Eco-friendly light control solution.

Child safety

The Weathermaster® Aluminium Venetian Blind range is available with a unique stylish BreakThruCord Connector which is designed to break apart should weight or pressure be applied.

Sleek good looks

A classic for Kiwi homes that's now available in a range of colours finishes and slat widths. Manufactured in New Zealand from aluminium to retain its sleek good looks and deliver fine-tuned control over light and privacy for years to come.

Eco-friendly choice

Weathermaster® Aluminium Venetian Blinds are the Eco-friendly choice that utilises up to 97% recycled material. Plus the special 'bounceback' aluminium slats (Excludes Silverstar®) are very durable, resisting abrasion, peeling, scratching, discoloration and corrosion. Choose from different slat sizes and a range of colours to suit any shape of window.

Effective heat reflection

Weathermaster® Aluminium Venetian Blinds feature colour coordinated head-rails, bottom-rails and plastic components for a consistent match. And in addition to their durable good looks, these venetians can also provide very effective heat reflection, particularly in the lighter and metallic colours.

Operating systems

The right operating system makes life a little easier

Somfy® Automation

Hard-wired automation using a 240V motor integrated in the headrail. Controlled by a Wall Switch or Remote Control.

Cord and Wand

Featuring a lift cord and tilt wand, simply rotate the wand to precisely tilt the slats to any desired angle or into a fully closed position.

Slat sizes

Deliver fine-tuned control over light and privacy

25mm Silverstar Series II

Simple and stylish, providing a timeless design that suits many interior styles. In just seconds you can effortlessly control light and shade, ventilation and privacy.

25mm Goldstar

The premium Goldstar slat allows for better bounce back & less chance of bent slats. Special paint coatings keeps your Venetians looking beautiful for years to come.

50mm Venetian

Providing either a classic or contemporary look, the bigger slat provides more view through and a less cluttered look on the window.
